

# Temperature Controlled 2K Static Mixer Block

*Patent Pending*

- Works with Recorable Coax Hose Technology
- Carries temperature control all the way to the point-of-mix
- Compatible with all SCS Temperature Control Units
- Provides single-point water connection for both Resin and Catalyst paths
- Distributes water evenly between Resin and Catalyst hoses for even temperature control
- Temperature sensor port in resin path directly adjacent to static mixer port
- Check valves in each material path eliminates backflow
- Can be mounted inside a standard robot arm at the wrist
- Compatible with standard clean-in-place processes
- Can be disassembled for cleaning or rebuild if required
